Sir,

With due respect I would like to request you for an educational visit for our students, Department of Zoology (5th sem. Honours, 5th Sem .general and GE3), aquaculture farms in your area as mention in their course. We are planning to visit on 12th December 2023 (With reference to Suman Kumar Sahu) with approximately 80 students and 5 teachers and 1 lab attendant.

I will be very glad if you kindly accept my request and arrange a one day visit programme and a one hour lecture workshop.

Some Glimpses of Nandigram Excursion

OUTCOME OF FIELD EXCURSION:

1. Fisheries outcomes encompass the overall results and impacts of fishing activities on aquatic ecosystems and communities.
2. It arises from sustainable practices , such as effective management, responsible harvesting and ecosystem friendly approaches.
3. It leads to maintained fish stocks, biodiversity conservation and socio –economic benefits for communities reliant on fishing.
4. Conversely, unsustainable practices, like overfishing, habitat degradation and pollution can have detrimental effects.
5. Overfishing depletes fish populations, disrupting the balance of ecosystems and threatening species survival.
6. Pollution and habitat destruction further harm aquatic environments, affecting both marine life and the livelihoods of those dependent on fisheries.
7. Achieving a balance between exploitation and conservation is crucial for ensuring the long-term health of fisheries and the well-being of associated ecosystems and communities. Effective policies, international cooperation and public awareness play pivotal roles in shaping the outcomes of fisheries.
