

Report on
**Certificate course on "WASTE
MANAGEMENT & SUSTAINABILITY"**

Organized by
Department of Zoology

Mugberia Gangadhar Mahavidyalaya

Under

DBT star college strengthening scheme, Govt. of India

Programme Supervised by: Dr.Kousik Kr.Mondal

Date: 17th JANUARY, 2023

Soumitra
17.01.2023
Principal
Mugberia Gangadhar Mahavidyalaya

Departmental meeting held on 10.01.2023

Members present:

1. Dr. Kousik Kr.Mondal, HOD, SACT
2. Raju Majumdar, SACT
3. Sayantika Bera, SACT
4. Purnima Mandal, SACT
5. Sarbani Mahata, Contractual Assistant Professor.
6. Subhadeep Maiti. Contractual Assistant Professor

Decision taken in the meeting:

- We are going to organize Certificate course on WASTE MANAGEMENT & SUSTAINABILITY
- It is decided that Dr.Kousik Kr.Mondal will be the program coordinator and Purnima Mandal will be the course coordinator of the program.
- The course period will be scheduled from 23.03 .2023 – 26.07.2023
- The participant students will be UG- 2nd SEM , UG- 4th SEM and 6th SEM
- It is decided that the course will be delivered by lecture, interaction method. HOD will forward the matter for approval of this program from academic subcommittee. Teachers are requested to prepare a routine for smooth running of course.

Certificate course
On
"WASTE MANAGEMENT & SUSTAINABILITY"

The outcome of waste management and sustainability efforts can have a significant impact on both the environment and society. Here are some potential outcomes and benefits of effective waste management and sustainability practices:

Reduced Environmental Pollution: Proper waste management helps prevent pollution of air, water, and soil. It reduces the release of harmful chemicals and greenhouse gases into the environment, mitigating the negative effects on ecosystems and human health.

Conservation of Natural Resources: Sustainable waste management promotes recycling and resource recovery. This conserves valuable natural resources like metals, minerals, and water, reducing the need for raw material extraction and energy consumption.

Energy Recovery: Some waste-to-energy technologies can convert non-recyclable waste into electricity or heat, contributing to energy security and reducing greenhouse gas emissions.

Improved Public Health: Effective waste management minimizes the risk of disease transmission through proper disposal and sanitation. It also reduces exposure to hazardous substances, benefiting public health.

Economic Benefits: Sustainable waste management can create job opportunities in recycling, waste collection, and waste processing industries. It can also reduce disposal costs and generate revenue from recyclable materials.

Conservation of Land: Landfills take up valuable land space. Sustainable waste management practices, such as waste reduction and recycling, can help preserve land for other purposes.

Community Engagement: Waste management and sustainability initiatives often involve community participation and education. These programs can raise awareness about environmental issues and encourage responsible behavior.

Reduced Carbon Footprint: Recycling and composting help reduce the carbon footprint by lowering the energy required to produce new products and reducing methane emissions from landfills.

Resource Efficiency: Sustainable waste management emphasizes the concept of a circular economy, where materials are reused, recycled, or repurposed, reducing the need for virgin resources and minimizing waste generation.

Regulatory Compliance: Adhering to waste management and sustainability regulations can help organizations avoid fines and legal issues while demonstrating their commitment to environmental responsibility.

Long-term Sustainability: Effective waste management is essential for the long-term sustainability of communities and industries. It ensures that resources are managed wisely and that environmental impacts are minimized for future generations.

Innovation and Technological Advancement: The pursuit of sustainable waste management has led to innovations in waste-to-energy technologies, recycling processes, and eco-friendly materials, fostering technological advancement.
