About Organizing Institute

Mugberia Gangadhar Mahavidyalaya was established on 2nd July 1964 as Co-educational College in Bhupatinagar village situated in Bhagawanpur-II Block under Contai Sub-division of Purba Medinipur District, West Bengal by a Society of the same name. From its very beginning the college is trying to fulfil one of the noble objectives "To promote educational facilities of all types, including studies in Arts (Humanities), Science, Technical and Vocational Courses". This degree college began as an Arts college, but now it expands by opening three streams – Arts, Science, Commerce and a Physical Education Training Course (B.P.Ed & M.P.Ed). It even runs many job oriented courses. The college is awarded with CPE under UGC XII plan and Star College Strengthening Scheme for Chemistry, Mathematics and Zoology from DBT, Government of India. Thus, the goals of the society are transmitted into academic and extension activities.

About The Seminar

21st century, to a great extent has changed the goals and quality of education worldwide. The change in turn, had created new avenues of understanding and acquisition of knowledge is very necessary to get it in the right path. As we know that, within the period of global Pandemic, educational system had gone through dramatic changes, which drastically alters our traditional way of thinking, a brought in new phrases like, Entrepreneurship, Start-ups, Proto types etc. Accordingly, the use of modern ICT based technologies in educational sectors and blended mode of learning was part and parcel of each educational institute due to this change. Following the trail of changes, these practices are now-a-days very much familiar to teachers and learners. However, irrespective of changes the aim of education is still unchanged and directed towards all round development of a learner.

The impact of globalisation and digitization had a great role that moulded our lives. The impact was much debated in many literatures however; many scholars believed that it connects the world for a better progress. Now, in order to perpetuate education to the grassroots level, it is necessary to understand the idea of Sustainable Development in Education (hereafter SDE). SDE allows every human being to acquire the knowledge, skills, attitudes and values necessary to save a sustainable future, which was described as the primary objective of the National Education Policy-2020. It also requires participatory teaching and learning which follows different methods that motivate and empower learners to change their social behaviour. NEP 2020 is undoubtedly a comprehensive policy that covers all aspects of education, from early childhood education to higher education and vocational training. It focuses on students' individual needs. The policy also seeks to create a more flexible and adaptive education system that can meet the needs of students and the economy as a whole. Value based Education shall always play a key role in the development of mindset of a child as well as helped our society to be benevolent as our core values are moral guides according to study.

Now the objective of the seminar is to cultivate all the above ideas by exploring logical reasoning and critical analysis of the recent reform in educational sectors, from Primary school to HEIs. It is also aimed to develop multiple avenues which will be beneficial for the student as well as the teachers an all other who are associated with academia. This seminar also seeks to address the idea of blended mode of education an ICT based education. By articulating value based quality education one can go deeper into the ideas of what was depicted in the first line of NEP-2020 that "Education is fundamental for achieving full human potential, developing an equitable and just society, and promoting National development". Education with multidisciplinary approach was given priority in recent times. Pedagogical approaches too are being juxtaposed with active learning, lesson planning and active processing of information, technology and real world applications on professional practises which are tuned with modern approach to education. Indeed, with time, the educational thinker and people associated with academia have extended positive role towards academic environment and created a sustainable outlook for is academic fraternity, where students and teachers can cope up with issue and challenges they faced, moreover, where student will learn by doing. The so called new education system will meet the current demands of students so that they can serve the globalized world, in other words can be the future master of Atmanirbhar Bharat or self-reliant India. In a large perspective, the new education will be valuable for all the aspirants of new generation and by which they will be able to succeed in a HEIs and can be eligible for a brighter career.
