**Vriksha Raksha Bandhan** event was celebrated on 1<sup>st</sup> September 2021, through online mode, during COVID-19 period. Mass participation were observed in this particular programme where students put on rakhis on the trees as they made them one of their own family members. Trees are those form of life which existed on earth from long before the humans do. As the human civilization thrives, trees are being used in different ways to make human life's better. Even except that, Trees were one of the most important parts of the nature. Because they absorb Carbon-di-oxide and release oxygen by Photosynthesis, reduces soil Erosion by binding soil to their strong roots, absorb carbon from the atmosphere and store them on wood and bark, thus slowing the rate of Global warming. Not only that, they also provide food and shelter to humans and animals, presents clean water, firewood for cooking foods etc.

As the human civilization continues to thrive, trees are being used for different purposes. To fulfil those needs of Society, people are cutting trees for various reasons such as making home out of woods, to clear land, agricultural purpose, making wooden furniture, business reasons etc.

At this point, improvement of quality of human life has come to a satisfactory position, but in order to reach that improvement, balance of the nature is been interrupted which leads all living creatures to grave dangers. Importance of this programme is to make realize the upcoming generations that trees aren't properties for us to use only, but also a major part of our life and mother nature. We should not repeat the mistakes of past generations, instead we must welcome them as a part of our family.

It is a stunning movement by Mugberia Gangadhar Mahavidyalaya, led by the honourable Principal, Dr.Swapn Kr. Misra by which the next generation will be careful to the consequences of nature and more encouraged for planting and caring trees as their own.
