ASSIGNMENT SET - II
Department of Nutrition
Mugberia Gangadhar Mahavidyalaya

Subject- B.Voc. in Food Processing

Semester-V

Paper Code: BVFPS502T

[DOCUMENTATION IN FOOD PROCESSING]

Answer all the questions:

Unit-1

1. How does proper documentation contribute to the overall quality management system in the food industry?

2. How can digital tools and software be used to streamline and enhance the documentation processes in the food industry?

3. What are the challenges and potential issues related to documentation in the food industry, and how can they be addressed effectively?

Unit-2

1. In what situations is the median a useful statistical measure in the food industry, and how is it applied to address data distribution and outliers?

2. How is the standard deviation employed in the food industry to assess the variability and consistency of process parameters, product characteristics, or consumer preferences?

Unit -3

1. How can an ERP system contribute to better cost management, resource allocation, and overall profitability in the food industry?
2. What are the considerations for selecting the right ERP solution for a food processing company, and what factors should be evaluated?
3. How can an ERP system support quality control, product recall management, and customer relationship management in the food industry?

Unit-4

1. How is technology utilized to streamline and automate the documentation of finished product details, such as barcode scanning, electronic record-keeping, or data integration systems?
2. What are the guidelines and regulations governing the documentation of finished product details, and how do companies ensure compliance with these requirements?
