12-15 p.m. to 1-00 p.m.: Speaker: Dr. Sanat Kumar Guchhait, Professor, Dept. of Geography,
The University of Burdwan

Lunch: 1-00 p.m. to 2-00p.m.

2-00 p.m. to 3 p.m. : Paper presentation

Chairperson: Dr. Suvroma Gupta, Principal, Khejuri College

Vote of thanks by Prof. Irani Banerjee Chatterjee, HOD, Dept. of Geography, MGM

4. Significance of the seminar:

Environmental degradation is an increasingly pressing issue that affects us all. It is caused by a variety of factors, ranging from human activities to natural disasters, and its effects can be devastating. Many of these effects can cause further degradation, which means that this impact works as a downward cycle. Fortunately, there are solutions, and we can all work together to mitigate its impacts. Plant with Purpose exists to help reverse this cycle and create a more sustainable future for communities all around our planet. The major factor of environmental degradation is human (modern urbanization, industrialization, overpopulation growth, deforestation, etc.) and natural (flood, typhoons, droughts, rising temperatures, fires, etc.) cause. Today, different kinds of human activities are the main reasons for environmental degradation

Soil degradation, water degradation, and air degradation are the three types of Environmental degradation. The degradation of those three environments impacts the worldwide climate and living conditions to an excellent extent.

Consequences include increased poverty, overcrowding, famine, weather extremes, species loss, acute and chronic medical illnesses, war and human rights abuses, and an increasingly unstable global situation that portends Malthusian chaos and disaster.

Today, we have an important question, how can we control environmental degradation?

1. Treating effluents and hot water before releasing them in ponds and rivers.
2. By recycling and reusing water in two or more stages, water usage can be minimized.
3. To meet water requirements, it is important to carry out rainwater harvesting.
4. Mechanical means are the primary treatment.
