PREFACE

The industrial training is the effort to produce link between the student and the industry in order to develop the awareness of industrial approaches to solve the problems based on the understanding of tools, plants and machinery process, mode of operation.

Having united our experience gained from the industrial training at *Tasty Confectionery*. We have been written the report that attempts to combine theory and laboratory applications.

The 9 days training is a part of the under-graduate (B.Voc) curriculum. The training adapting ourselves to the industrial environment and understanding the limitation and the freedom under which the engineers work. The training involves the industrial work and knowledge about the food industry and to know about raw materials used in different products made in this industry. To gain the knowledge about all kinds of primary tests of raw materials and testing of the final products and the packaging materials.

2. Sift the icing sugar into the bowl and stir it in.
3. Add the milk and the essence and beat well until you get a pale and fluffy mixture. If desired add few drops of food colouring.

Conclusion

Industrial visit is a most practical approach towards learning through interaction working practices etc. and hence gives a perfect reality check to the students.

It gives a lot of information about various aspects of production, marketing as well as the operation of a company. The dissemination of knowledge by the support organization also gives a clear scope to the transactional analysis of the company.

The industry is better to understand the world of work and to compare acquired in college. Observations were carried out over a real and direct the development of the task performed by a students who ultimately diligently in preparation for the plunge in the community or in the world of work.

During this training session we were also told about how we can control the environment pollution and the method installed in the industry to minimize the pollution.

It helped us to develop our confidence and to bridge a connection between the theoretical study & practical works.
