4.	<p><b>SK Khabiruddin</b>  <b>Psychic Physical Education and Society</b>  <b>Ethnographic Approach on Traditional Games and Sports of North-East India</b></p>	<p><b>Ethnographic Approach on Traditional Games and Sports of North East India</b>  <b>Sk. Khabiruddin Samiraa Mondal</b></p> <p><b>Abstract</b></p> <p><b>Background:</b> The north east state of India has become gradually a popular arena for rural as well as urban anthropological research on sports, like ethnicity, poverty, caste, and sub-cultural variations. <b>Conclusion:</b> The traditional games and sports of North East India have become a typical subculture in present day of India and North East is one of them. Aim: The aim of the review study is to observe the Ethnographic Approach on Traditional Games and Sports of North East India. Significant Socio-cultural anthropologists try to study games and sports from the point of view of its social structure, function which is connected with symbolic while attempting the structure and diffusion of a given society (Krober, 1936; Herskovits, 1956; Bose, 1961). Conclusion: North East of India includes Assam, Nagaland, Manipur, Arunachal Pradesh, Meghalaya, Tripura, Mizo, Lushai, Khasi, Naga, Tani, Pnar, etc. These are the traditional version of older day Wrestling, Judo, Fencing and Badminton. The tremendous importance of games and sports in society is due to the fact that they provide regular opportunities for interaction within traditional techniques, using well-known symbols.</p>	<p><b>Psychic Physical Education and Society</b></p>  <p>All rights reserved. Total two hundred and seventy (270) girls were randomly selected from West Bengal. The researcher was finally identified three groups according to their age i.e. 10-14, 14-18 and 18-22 year's age group. The researcher was self-constructed a 32-item type question with different five options i.e. Why do you play? (A) For fun (B) For health development (C) To make a good player (D) Influence by others and (E) For professional development. The subjects are individually solved this question. One individual subject was select only one reason from question. One individual subject was select only one reason from five options confidently. The number of girls who play for recreation was gradually decreased with the increased of their age. Girls play for developed their health this reason of play was developed with the increased of age. A small number of girls play for make a good player and this numbers was gradually decreased with the increased of their age up to 18 years. This minimum numbers remain same in 14 to 18 and 18 to 22 years age group. A maximum number of girls influenced by others to play this number was gradually decreased with the increased of their age. The number and percentage of girls who play for professional development or going job this number was highly increased with the increased of their age from 10 to 22 years.</p>	<p><b>Psychic Physical Education and Society</b></p>  <p>All rights reserved. 8.	<p><b>Mimu Seikh</b>  <b>Psychic Physical Education and Society</b>  <b>Assessment of Anxiety among teacher trainees of B. P. Ed</b></p>	 <p><b>Muslim Women and Their Barriers in Sports Participation</b>  <b>Sonom Sultana</b>  <b>Mimu Seikh</b></p> <p><b>Abstract</b>  <i>This study is a primary attempt to describe the concept of Muslim women participation in games &amp; sports in Islam along with its practices and principles. The population of this study was all Muslim female students of B.P.Ed teacher trainees of four districts in West Bengal (Burdwan, Purba Medinipur, Bankura, 24 Parganas). Total 73 female students are selected from within the population through convenient or available sampling technique. For the purpose of collection of data a structured questionnaire on three point Likert scale, ranging from disagree (DA= 1 points) to agree (A= 3 points), was used. The main objective of the study was to know about the participation barriers of Muslim women in sports participation. The result of the study indicated that Muslim women are experiencing particular problems in games &amp; sports participation with their ethnicity, culture, dress code but they like sports and they wants to participate in sports for overall development. But their parents, family members, relatives are not constrained them to participate in sports but the society members discourages them to participate in sports. The result of the study further confirmed that Islam permits the women to participate in sports for good health, fitness and healthy life style after observing the Islamic dress code in West Bengal.</i></p> <p><b>Keywords:</b> Muslim women, Problem, Islam, Sports participation</p>

It periodic transmission of CoV continues the health of the people is not introduced yet. Presently a study is carried out to define the health promoting effect of Ashwagandha has included its activity as an anti-inflammatory agent. The present study is concerned with immune system. The researcher finds various aspects. It can be estimated that Ashwagandha has anti-inflammatory properties. Involving the lung the inflammatory response is known as acute lung injury (ALI). It is a severe, life-threatening, anti-inflammatory activity undertaken of the plant. Various studies have shown that Ashwagandha has anti-inflammatory properties that also used as a therapy of ALI and COVID-19. Presently availability researchers are developing various pharmaceutical formulations like Spironone, celecoxib, nonsteroidal anti-inflammatory drugs against COVID-19. However, to prove a fact a large amount of clinical trials are required.</p> <p><b>Keywords:</b> Curcumin, CoV, anti-inflammatory, cytokine storms, acute lung injury.</p>

Waste management from food and its end uses in fork. Developers of food products have waste that they developed countries and the food waste comes from several sources like household, food product manufacturing industry, source of different food services, distribution and retail. This huge amount of organic waste gives negative impact to environment as the disposal of this large amount of waste is expensive and some time creates legal problems. In this chapter, the author studies there is a threat to environment added because of waste from the food and by-products of food. This kind of value-added bioactive compounds are dietary fibre, vitamins, phytocompounds etc. and they show several physiological functions like anti-oxidative, anti-diarrhoeal and anti-pathogenic activity. Nowadays ecological concept of sustainable development economics trade to create significant level of attention for the products of our waste. In this chapter, the author studies that fiber is utilized as bonding material for the innovation of new health products and their functional. Dietary fibers obtained from several foods manufacturing industries help to reduce hypertension, diabetes, blood cholesterol etc. and also used for building. Due to the presence of potential bioactive components in food waste and by-products in our era considerable attention is going to relate and utilize them as highly pharmacological elements.</p> <p><b>Keywords:</b> Waste, by-products, dietary fibres, protein, phytochemical, fat replacer</p>

## Sucheta Sahoo Various Value-Added Food Products from Mushroom

This book is a collection of articles written by eminent resource persons from different institutions. It consists of review article and research article on various topics related to mushroom. It includes the cultivation, production, processing, contribution has provided diverse different types of edible mushrooms, nutritional value and their applications. This book is a valuable source of information, value-added products of mushroom, and to increase a source of some of the world class of Bengal. In the given information about how mushroom cultivation can be increased and developed through a concerted effort.

**Dr. Bidhan Chandra Samanta**

Dr. Samanta is an Associate Professor of Chemistry at Regional Institute of Technology, Gangtok, Sikkim, India. He did his M.Sc. in Chemistry from Regional College of Jammu, J&K, with organic chemistry from Regional College of Jammu, J&K, and Ph.D. in Organic Chemistry from North Bengal University in 2007. H. 0. 2014 from CSIR-CMERI, Jharpur, Jharkhand.

**Dr. Narottam Sutrathar**

Dr. Sutrathar is a research scientist with 2 research works. He has also published 10 research papers. His research interests include the synthesis of nano materials and their application in catalysis, environmental remediation, biological and medical applications.

Chapter 4  
Various Value-Added Food Products from Mushroom  
Sucheta Sahoo, Paloma Roy, Dr. Apurba Giri

4.3. Introduction

Mushrooms are known as filamentous fungi. It is healthy, anti-cancer, anti-inflammatory, anti-diabetic, anti-fungal, anti-spasmodic, anti-obesity etc. Mushrooms consist of 92% moisture, 4% carbohydrate<sup>2</sup>. Protein, less than 1% fat and it has several vitamins and minerals. Vitamins like thiamine, riboflavin, niacin, pantothenic acid, pyridoxine, folate, biotin, etc. are also present in mushrooms.

For long storage of mushrooms drying is most effective method. Various dryer like tray dryer, cabinet dryer, freeze dryer, fluidized bed dryer is used. After grinding of dried mushroom, mushroom powder is obtained and various novel value-added products like biscuits, cookies, noodles, pasta, laddo are prepared from it. Some nutrient rich

Chapter 10  
Oyster Mushrooms And Its Application  
Pratati Ray

10.1 Introduction

These are now more mushrooms in our country, around them Oyster mushrooms (OM) is very popular, which can be easily cultivated in our home with cheap rate, short time and labor. It's also known as Jitmukhi mushroom. Pleurotus ostreatus var. eryngii, Pleurotus cyathiformis, Pleurotus sajor-caju, Pleurotus cornucopiae, Pleurotus pulmonarius, Pleurotus citrinopileatus, Hypholoma fasciatum and Pleurotus tuberculosus. These are available over 20 species of Pleurotus, but these five to eight popular different varieties are mostly likely to be cultivated and sold.

10.2 Different Types of Oyster Mushrooms

Oyster mushrooms consists of a number of different species included Pleurotus ostreatus, Pleurotus eryngii, Pleurotus cyathiformis, Pleurotus sajor-caju, Pleurotus cornucopiae, Pleurotus pulmonarius, Pleurotus citrinopileatus, Hypholoma fasciatum and Pleurotus tuberculosus. These are the most common type of oyster mushroom, particularly found in North America. They are white or light brownish-gray in color, reminiscent of pearl, with large valve

Chapter 9  
The Green Mold Disease in Mushrooms Cultivation: A Review  
Manas Khatua

9.1. Introduction

Inside of mushroom as food and its cultivation for its consumption gradually acquired a worldwide appeal as ever-increasing demand has immensely influenced the economy. In this context the occurrence of green mold disease of mushrooms, which can severely affect the quality of mushrooms and cultivation pose a great threat and demands solution to combat it. Considerable volume of works have been done on this pathogen was identified as *Trichoderma aggressivum*, *Lentinula edodes* (L.) Sing. Imbach (button mushroom), *Lentinula edodes* (Shitake) and *Pleurotus (Jacq.) P. Karst.* (oyster mushroom) are the most commercially important basidiomyceteous mushrooms grown by green mold. The production is being increasingly affected by green mold. The aim of this chapter is to give an account of mushroom, including the present global status of the green mold disease and control.

The title was identified as "The Green Mold Disease in Mushrooms Cultivation: A Review" by Manas Khatua.

9.2. Materials and Methods

Materials and methods were obtained from various sources and their sources, area of work, isolation, identification, characterization, growth conditions, culture media, and other experimental designs and their results were discussed.

9.3. Results and Discussion

Isolation and identification of green mold from mushroom was done by using various methods like direct inoculation, surface sterilization, and liquid inoculation.

9.4. Conclusion

Green mold disease is also known as "Witches Broom" as it grows relatively high temperature. The high temperature is required 30°C to 35°C for mycelium development and 34°C to

87	<p><b>Taniya Neogi</b>  <b>Of Chaste Men and Christian Marriages : Matrimony, Morality and Manliness in Henry Fielding's Joseph Andrews</b></p>	<p><b>Of Chaste Men and Christian Marriages: Matrimony, Morality and Manliness in Joseph Andrews</b> TANIYA NEOGI  HENRY FIELDING JOSEPH ANDREWS Edited by Deblina Hazra</p> <p>The marriage plot refers to a narrative which revolves around the obstacles that a couple has to negotiate before they can achieve the felicity of marital consummation. It revolves around communal themes: either focusing on the process of courtship (usually stopping at the threshold of matrimony, with a wedding ceremony and an inscription of the happiness that will follow), or presenting a moment of crisis in the marriage plot, such as infidelity, adultery, or secreted marriage.</p> <p>The marriage ending was a standardized norm in the themes of the seventeenth and eighteenth centuries—the expected happy denouement after a tumultuous courtship. The marriage plot, with its associated concerns of class and commerce, was a consistent theme in Henry Fielding's plays as later in a more extended form, in his novels. Of the twenty-eight plays he wrote, only two did not have a marriage plot and the matrimony theme. In <i>Love in Several Masques</i> (1728), his first theatrical production, Fielding explored the theme of marriage hinged on the conflict between material consideration and affection. In <i>The Temple Beau</i> (1730) and <i>An Old Man Taught Wisdom</i> (1735), Fielding presents the theme as a satire against the commercialisation of marriage. While the marriage plot is a regular feature of the novels, it is not yet the cornerstone in the present literary form of the novel. The early novels of Aphra Behn, Defoe's <i>Moll Flanders</i>, and Eliza Haywood provided a spate of anti-novel discourse for their predominantly amatory content. In these novels, the storylines revolve around the seduction and abandonment of credulous, virginal women that end in misery, death or a marriage</p> <p>WORLDVIEW PUBLICATIONS An Imprint of Book Land Publishing Co. Achieving this requires socio-social measures and environmental review. The status of women's health in India has improved considerably in terms of health, education and employment. Despite this, there is a much weaker position that exists in terms of health indicators. Each and every government has consistently taken various programs to protect women's health by recognizing the situation. Under rural health mission, the scheme mainly provides pre-natal, post-natal care to women. The scheme also provides health programs mainly help women with nutrition and their health. Apart from this, several project schemes for the public are aimed at women's health. Home-based intervention improves women's health much rather than medical intervention. So the main aim of these programs is the education and employment of women. In both these cases, the main target of the country-wide campaign 'Surya Shikhi Abhiyan' and 'Employment Assurance Scheme' are girls and women. Self-reliant projects, microcredit projects help women to increase their skills, as well as help them increase their own wealth by showing them the alternative ways of living.    Keywords: Women's health, rural health mission, post-natal care to women, medical intervention, self-reliant projects, microcredit projects.</p> <p><b>Introduction:</b>    You can tell the condition of a nation by looking at the status of its women". Jawaharlal Nehru    Women represent the cornerstone of a family's overall health, ensuring they have access to quality care also can lead to improved health for children and families.</p>

Barman, K. M. R. N. Giri, A. De</p> <p>Check for updates</p> <p>Author &amp; Article Information AIP Conf. Proc. 2718, 050003 (2023) https://doi.org/10.1063/5.0137433</p> <p>Share Tools</p> <p>Japanese encephalitis (JE), a public health problem for the entire world, is caused by a virus called Japanese encephalitis virus (JEV) which spread by mosquitoes. According to WHO's report, nearly 68000 clinical cases of JE are reported globally each year and approximately 4000 to 20400 deaths. Here, a mathematical model of JE is formulated considering different control measures such as vaccination, treatment, insecticide and efforts to reduce environmental discharges. An explicit expression of basic reproduction number is formulated and the stability of disease-free and endemic equilibrium is also considered. The stability analysis is done by using the method of Lyapunov functions.</p>
