About the Organizing Institute

Mugberia Gangadhar Mahavidyalaya was established on 20 July 1964 as an educational college in Bhupatnagar village situated in Bhupatnagar II Block under Centre Sub-Division of Purba Medinipur District, West Bengal by a group of the same name. From its very inception the college is trying to fill all gaps of the rural population. It provides educational facilities in all types including studies in Arts (Humanities), Science, Technical and Vocational Courses. The degree courses began as Arts College, but now it expands to opening these courses. All Science Courses and Physical Education Training Courses (B.P.Ed & M.P.Ed). It even runs many short courses. Presently the college has been awarded with DBT Star College Strengthening Scheme for Chemistry, Mathematics and Biology departments and also awarded with College with Potential for Excellence status by the UGC under XII Plan. It is NAAC Re-accredited B+ Level Institution (CPE XII Plan) and approved by NCTE. The goals of the society are to transmit and academic and extension activities.

It is situated at Mugberia with a great heritage of culture and sporting. It is about 40 km from Kolkata, about 10 km from Centre Sub-Division, and about 10 km from Jamal, the District headquarters of Purba Medinipur District, West Bengal.

Background and objectives of the workshop
Along with the course for fundamental aspects, scientists have always been interested in designing practical applications of scientific advances in the form of devices, drugs, catalysts etc. for mankind. The goal of fundamental studies in the interface of chemical sciences and biology is to understand life in chemical terms. Our ability to appreciate the translation of biology into chemical terms is closely related to our fundamental understanding of life's machinery. However, there are still some challenges for chemists to:

to meet these challenges, more and more researchers at the interface of chemical sciences and biology are going on particularly for the prevention, diagnosis, and treatment of diseases. But the students belonging to the rural and backward areas of West Bengal are completely unaware about these knowledge and encouragement to the rural students nearly students from rural and nearby villages regarding recent trends in application based researches in chemical sciences.

Protein rich Chana spread with herbs proteinrichchana22@gmail.com 9822143116 Female
FY of Development: 2022-23 Developed as part of: Academic Requirement Study Project Innovation Type: TRI LEVEL: 2 Product

Theme: Food Processing/ Nutrition/ Biotech.

Define the problem and its relevance to today's market / society / industry need:
There are different kinds of sandwich spreads in the market, but low in dietary fiber. Due to low amount of dietary fiber, constipations, heart disease, overweight and obesity etc. are very commonly spreading throughout the world. One type of sandwich spread should be developed to fill up the rest of the requirement of dietary fiber to prevent the diseases. This is a good better alternative for diet conscious persons. The spread is full of Ca which is good for growth and bone development. It is easy to make, very time saving and pocket friendly.

Describe the Solution / Proposed / Developed:
Chana is a nutrient dense food, high - protein food. If we make chana spread with addition of tinda, it will give a fair amount of dietary fiber to the consumers. Also if we add some kinds of herbs into it, it will give more functionality to the spread. It will come out with result of healthy and instant sandwich spread to prevent the diseases and will keep the consumer fit. It will be very time - saving and pocket friendly for breakfast.

Explain the uniqueness and distinctive features of the (product / process / service) solution:
Chana spread is invented but the market, bought chana spreads contain very less amount of dietary fiber. So by this invention I want to increase the dietary fiber amount in the spread. There is no such type of innovation of chana spread with the addition of tinda which makes it unique and useful for the society.

How your proposed / developed (product / process / service) solution is different from similar kind of product by the competitors if any:
There are less competitors in market who are manufacturers of chana spread. Also there is no particular development of tinda added chana spread. So this developed product will be different from similar kind of product if there is any competitor.

Is there any IP or Patentable Component associated with the Solution?:
No

Copy of IP/Patent Applied or Obtained: [View File](#)

50. DBT sponsored Two - Day Virtual National Conference on Recent Development of Chemical Research being implemented in Biology and Medicine dated 2nd & 3rd November, 2021

Recent Development of Chemical Research being implemented in Biology and Medicine
A TWO DAY NATIONAL CONFERENCE

Organized by Department of Chemistry MUGBERIA GANGADHAR MAHAVIDYALAYA

Supported by: DBT (Govt. of India)

2nd & 3rd Nov, 2021

Organizing President: Dr. Soumen K. Misra, Principal, Mugberia Gangadhar Mahavidyalaya

Inaugurator: Prof. Ishank Ghosh, Vice-Chancellor, Buni (Bansari) Green University, Hooghly, West Bengal

Spokesman: Dr. Ashi Basak, Visiting Professor, School of Bioscience, IIT, Kharagpur, West Bengal

Spokesman: Dr. Pradyumn Mehta, Professor and Ex-Coordinator, School of Material Sc & Tech, IIT-BHU, Varanasi, UP

Spokesman: Dr. Tanmay Pathak, Professor, Dept of Chemistry, IIT, Kharagpur, WB

Coordinator & Spokesman: Dr. Bilal Chandra Samanta, Associate Prof., IROD Chemistry, Coordinator, Star College Scheme, Mugberia Gangadhar Mahavidyalaya

Theme of the Webinar: Natural and synthetic chemical compounds have served mankind for healing and life saving purpose since ancient times. However better understanding of human physiology, its working procedure, constituent elements of human body, its interaction with environment along with the development of technology in different field of science has triggered discovery of newer drug molecules with better healing abilities. Development of inorganic materials like polymers, nano-materials is coming up with emerging techniques of drug delivery with better results for treatment of cancer, heart blockage, cataract etc. Nanomaterials are coming up with their antibacterial, antiviral effect for fighting pandemic situations like COVID 19. Uses of newer inorganic elements are also finding their abilities towards new possibilities in therapeutic use.

Theme of the Webinar
Natural and synthetic chemical compounds have served mankind for healing and life saving purpose since ancient times. However better understanding of human physiology, its working procedure, constituent elements of human body, its interaction with environment along with the development of technology in different field of science has triggered discovery of newer drug molecules with better healing abilities. Development of inorganic materials like polymers, nano-materials is coming up with emerging techniques of drug delivery with better results for treatment of cancer, heart blockage, cataract etc. Nanomaterials are coming up with their antibacterial, antiviral effect for fighting pandemic situations like COVID 19. Uses of newer inorganic elements are also finding their abilities towards new possibilities in therapeutic use.

Sub-Theme
Sustained drug delivery, Controlled drug delivery, Therapeutic use of Nanomaterials, Nanotechnology and drug delivery, Nanomedicine, Therapeutic use of Organometallic compounds, Nanomaterials against COVID, Nanotechnology to fight cancer, Targeted drug delivery, Ocular drug delivery, Transdermal drug etc.

Theme of the Webinar
In the present century, we are living in an era of pollution of all types. Prevention of pollution is an uphill task before mankind. At present we are faced with an unprecedented crisis in the form of corona virus. One can only sense that the world will be faced with such crisis more often than in future. The sages of yore had a vision of life. They strongly pleaded for preventing mind from pollution. If the mind is purified, they argued, other types of environmental pollution can be minimized, if not totally prevented. Our 'vedas' are the repository of human knowledge for human beings. They contain the essence of integrated approach when knowledge, emotion and action are reconciled to enable the individual and the group to lead a healthy and purposeful life. Our International Webinar would deliberate on this central idea of combating with corona virus through the ancient science of Ayurveda.

About the Webinar
The COVID-19 pandemic has been taking its toll on the world for months now. Scientists around the globe are working to develop an effective treatment for the novel coronavirus, SARS-CoV-2. Until such a time, the world is reliant on physical distancing measures and personal protective equipment (PPE). Some countries are using 'track and trace' systems to monitor the movements of people and notify those who have been in contact with somebody.
